*It is necessary to have a
look at hygiene areas
at first in*

order to understand how quality a place is. That is why these areas are as a summary of how a host or manager give importance to quality in each product and service. They are a photo of how meticulous you are in your personal areas.

CONCEALED CISTERNS

Concealed cisterns show your bathroom more esthetic by hiding the water tank inside of the wall. In addition to not disrupting the design integrity of the space, it is a system that also saves water. It is easy to install and applicable to drywall as well as brick walls.

Technical Details

When we went to space and turned our backs;

we had the chance to look at our own planet from afar for the very first time, first thing that caught our eye about this planet we call home was the endless dazzling blue. It was such a dazzling blue that the "Blue Planet" got its name from its impulse...

There was a ratio of blue that could amaze the human mind: 71 percent. A proportion with its majestic rivers that inspired our ideas, its terrifying and vivacious oceans and its admirable characteristic lakes. Sources of life that make the earth livable... And besides that there was another rate which was difficult to accept... 0.8!

So what was that 0.8?

Contrary to what seems to be infinite, a reality that shows our current situation..

Our consumable water.

A rate that is decreasing day by day, threatening the future. 0.8. That tiny proportion was a miracle of life. This fascinating journey which has been going on for centuries, enlightening the future, beginning from the birth of civilization to the unknown endlessness of space today. Even in that infinite space we always searched for what was inside of us and there we always had the following certain question in our minds: is there any fountain of life on other planets?

11050 | 50 cm washbasin

Box Size / Kutu Ölçüleri	160x500x478 mm
Weight / Ağırlık	12,30 kg (+/- %5)
Volume / Hacim	0,038 m ³
